WORK BEAUTIFULLY

Through good design we can make a positive impact in every workplace.

**At Verco, we understand that aspirational workspaces will enhance motivation, attract the best talent and create a healthier, happier work-force. That's why we create intelligent office furniture that's not only functional but mindful, placing workplace well-being firmly at its centre.**

We are a British, family-run business who design and manufacture bespoke, high-end office furniture, carefully crafted for the well-being of everyone. Through beautiful, considered, intelligent design we are committed to making a positive impact in every workplace, everywhere.

## Verco environmental and sustainability certification

As one of the UK's leading office furniture manufacturers we are committed to protecting the environment. We understand that it is our responsibility to minimise the impact we have on the environment, wherever possible. We believe that time taken at the design stage of any new product can have a fundamental and long-lasting affect on that product's environmental impact.

From the careful selection of materials to maximise the recycled content and to minimise both the energy and CO2 footprints, to the 'end of life' recyclability of the component parts, particular consideration has been given to the environmental impact at every stage, from the design concept through to final production.

### ISO certification:

- ISO 9001:2015 –** Quality Assurance
- ISO 14001:2015 –** Environmental Management System
- ISO 45001: 2018 –** Occupational Health and Safety Management

These Quality Assurance, Environmental Management, and Occupational Health and Safety Management certifications demonstrate our commitment to our environment, our suppliers, our employees and to our customers and, as a business which has been in business for over 100 years, are something that we take seriously.

### FSC® certification

The Forest Stewardship Council (FSC®) purpose is to promote environmentally appropriate, socially beneficial, and economically viable management of the world's forests to meet the needs of the present generation, without compromising those of future generations. It does this by developing standards, certification and through trademark recognition. The process of tracking a product back to the source forest is called 'Chain of Custody' (C.O.C.) Certification.

Through C.O.C. a Company can demonstrate their commitment to the environment and responsible forest management.

### F.I.S.P. Furniture Industry Sustainability Programme

FISP is an independently certified sustainability programme, created to tailor to the needs of the Furniture Industry, aimed at driving sustainability in the furniture supply chain.

FISP promotes best practices to drive social, economic, and environmental change by continually improving members' business operations. FISP is the recognised benchmark for sustainable practices in the UK furniture industry, and has rapidly become the furniture industry forum on all environmental and sustainability issues. These issues relate to all aspects of the industry's business, from purchasing and procurement to the end of product life, including social, ethical and employment concerns and waste, energy, and emissions.

### Carbon Reduction Plan

Under our published Carbon reduction plan, Verco office Furniture is committed to achieving Net Zero by 2050. To continue our progress to achieving Net Zero by 2050, we have adopted the following carbon reduction targets. We project that we will decrease our carbon emissions by 10% over the next five years, by 2028.

Our Carbon reduction plan may be seen on and downloaded from, our website and has been reviewed and signed off by the Board of Directors of Verco Office Furniture Limited.

# a workplace evolution

## **The way we work is constantly evolving.**

People expect flexibility around when,  
where and how we work.

From the colour of the walls to the design of  
the furniture, we believe that beautiful spaces  
to work, thrive and innovate today will help  
grow the businesses of tomorrow.

jensen-study - seating booths

Creating a new workspace for the agile working environment, the Jensen-study provides a new way of working for more focused individual working in 'break-out' spaces. Based on the popular Jensen range, and using two single armchairs in combination with a shared table, the Jensen-study provides an ideal 'hot desk' away from the workstation and a more informal, but connected working environment.

The attention to detail is apparent in the crisp upholstery and the beautifully sculptured table with a solid wood edge profile, while a simple, but elegant screen provides a degree of privacy when required.

# box-it landscape booths

Creating the perfect meeting place is made simple with the versatile Box-it landscape soft seating units

The flexible seating units are able to be adapted to any environment or requirement, creating a 'community' seating experience, fostering an easy and informal atmosphere, while creating a sense of place and identity.

The booth can easily be specified to produce different dimensions booths, dependant on the requirement, by introducing standard Box-it landscape units between the 120° units, increasing the versatility and flexibility of these practical, comfortable and agile seating units, allowing you to 'play' with the different Box-it units to create **your** shape for the space **you** have, without compromise.

PLZ COR

Taking inspiration from the popular Plaza modular soft seating units, the Plaza Landscape units offer more generous dimensioned seats, with softer upholstery, together with a slightly higher seating position. This allows the units to provide bench seating for more than simply architectural statement pieces, providing the building blocks for meeting, working and dining landscapes, in combination with lounge height tables.

The range incorporates a corner unit to provide stylish, collaborative activity-based work settings in the workplace

brix solo work booth

The office is a changing shape and function as more people return to the workplace. The requirement for furniture is no longer simply to provide a space to work, but to provide a safe, private, flexible workspace away from the workstation.

A place where you can relax, recoup after a lengthy meeting, or to maintain focus in a comfortable 'agile' environment, where power is close at hand and you can remain in touch with the workplace when required, but acoustically and physically separated from the hustle and bustle of the office.

Designed by Studio Verco.

# brix-up - seating booths

For informal meetings, or just some quiet time to contemplate, the Brix-up provides a versatile and flexible soft seating, meeting solution.

Based on the popular Brix bench seating the Brix-up combines an acoustic surround with a Brix bench to create a beautifully detailed unit to suit a new way of working.

Brimming with character these slightly retro units provide a perfect workspace away from your workplace.

kurt - seating booths

Kurt brings a new dimension to the seating booth...

Creating another new workspace for the agile working environment, Kurt provides an interesting and inspiring new space for working or meeting in the workplace. The softer, welcoming sofa units provide a relaxing and comfortable place to be, while the semi-transparent, 'voile' curtains provide a degree of privacy, while maintaining an important visual connection with the environment.

jensen-up - seating booths

Jensen-up affords privacy in the modern business workplace, an oasis of calm in an otherwise active environment.

Based on the popular Jensen soft seating sofa, Jensen-up combines an acoustic surround with a single, two or three seater sofa to suit a new way of working.

With fine attention to detail, the acoustic, high-backed, Jensen-up provides an ideal place for relaxing breaks, or casual and comfortable meetings, protected from the general hub-bub and distraction of background noise.

TT

The seat and buttons are the same colour fabric, lower back in a second colour fabric. Acoustic surround in a third colour fabric.

IOTT

The seat, lower back, upper back and inside faces are in one colour fabric, while the outside faces and buttons are in a second colour fabric

bee – high spine cluster pods

With both high and medium height panels, these cluster pods provide privacy and acoustic control when required, as well as maintaining a visual connection with the rest of the workplace.

Through its elegant and ergonomic design Bee can create a simple and clear architecture for the workplace, featuring high-tech laminate and sculpted, polished plywood finishes, combined with elegant upholstered panels up to a height of 1715mm.

Bee has been designed to both absorb and block the transfer of direct, transmitted, reflected and diffracted sound.

bee – in-line work booths

Booths and pods are available at two heights - 1215mm and 1715mm to provide the opportunity for different levels of acoustic and visual privacy.

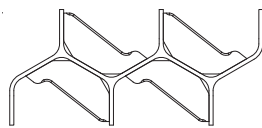

All panels are upholstered using foam backed **Blazer Lite** fabric from **Camira**, which is created from 100% Virgin wool and which is rapidly renewable and compostable.

bee – focus booths

Bee can provide you with the opportunity to create more interesting, focused working or studying environments within the busy 'open plan' office environment, with an even greater appreciation of aesthetics and acoustics than previously available.

Power units may be easily incorporated, where required and cable management is made simply, quick and effective.

bee – quiet pods

Bee quiet pods can provide you with the opportunity to create a relaxed meeting space within a busy workplace. Robust and sturdy Bee can provide an interesting and inspiring architecture for informal and occasional meetings.

Seating for the 'new' workplace

Greater emphasis is perhaps being placed on the office acting primarily as a place of communication and collaboration; conceivably the place to foster the Company culture and to inspire employees, rather than just a place to work. While standard sofas and lounge seating can provide an opportunity for relaxation, this new way of working now also requires quick and easy access to power, privacy, as well as to ergonomic comfort.

The Anna Work sofa and lounge seating collection can provide a key component in planning comfortable, supportive shared spaces for the new workplaces in the post-pandemic office, allowing relaxation collaboration and occasional work to take place whenever and wherever required. Simple, accessible, under-seat, or in-table power is available, wherever required, while robust laptop pads provide the platform for digital workbooks, a coffee or for a notebook.

With the help of high-speed mobile technology and easy access to power, people can work anywhere. The Anna work sofa collection can provide a versatile workplace for individuals and for teams of people.

Practical facilities, including tablets, armrests and easily accessible power modules can provide everyone with a comfy, ergonomic workplace away from the workstation.

Simple accessible, under-seat, or 'in-table power is available wherever required, while robust laptop pads provide the platform for digital workbooks, a coffee or a notebook.

All provided with the close attention to detail, the high quality manufacturing expertise and clarity of vision you have come to expect from the Verco Design Studio.

Where required, tables can replace seat cushions to provide the helpful spaces for coffee, bags or accessories and which can also be used to 'host' alternative power solutions.

Anna work sofas offer a comfortable and ergonomic seating experience, while making it possible to combine sofas units with seating benches, corner units, loose tables and occasional chairs to create the space that you need in today's workplace.

With Anna the workspace is limited only by your imagination.....

Modular, linear with a simple aesthetic and a visually light structure, Anna blends into any setting, with its carefully balanced proportions and elegant lines. The sofa displays a functional and aesthetic self-confidence by matching the upholstered structural framework with the substantial luxury of the soft upholstery of the seat and back cushions.

Anna has been designed by Studio Verco to assist in the creation of different 'neighbourhoods' within the office community. Creating a vibrant 'village' of different, interesting and thoughtful spaces for different work scenarios. Neighbourhoods are social communities and Anna provides considerable opportunities for face-to-face interaction among users, while also providing a variety of inspirational and reflective spaces to assist more focused work.

This recent addition of the high back to the range takes this collection to new heights, with more generous dimensions the comfort is increased and these superb lounge chairs display all the very best qualities and attention to detail expected from this prestigious range.

With beautiful lines and a wonderfully curved shell, the Snug chair can provide a more cosy, domestic feel to your workspace. Harking back to 70s styling the snug captures simplicity and beauty in one single chair. With generous upholstery and a choice of frames the snug chair can find a welcome home in any modern office environment, while the Snug Lounge chair brings elegance and sophistication to reception, break-out or waiting areas.

While the options of a 'lounge' height sled base, smooth four star swivelbase or a stylish solid timber four legged base on the NEW high back Snug, ensures that the collection is now one of the most versatile soft seating ranges within our portfolio.

wait and see

Wait and See offers an exciting take on the traditional tub armchair; a softly upholstered stool provides an informal and friendly seating solution, while for longer periods the Wait tub chair provides appealing levels of seating comfort with the same friendly and quietly confident form.

The modest proportions belie the dramatic impact that Wait and See can have, while the option of the two-tone upholstery can create a peaceful waiting, meeting or thinking area within your workplace.

TYL 1

Tyler offers a modern take on the traditional tub armchair; a plastic shell and a separate seat cushion, combine with a wooden leg frame to bring a different feel to your break-out and meeting areas.

The choice of different coloured plastic shells and different colours and texture through the seating cushion allow you to play subtly with your interior design, to create the perfect solution for your workplace.

cup

Cup offers a variety of shell colours and leg options from a sophisticated sled frame through a wooden four-legged frame to a swivel on a five star base.

Each can be used in domestic, or commercial environments for meeting, waiting and collaborative spaces.

The option of the wooden leg frame softens the product and is able to be further enhanced by the optional seat pad.

For informal meetings, or just some quiet time to contemplate, the brix-up provides a versatile and flexible soft seating, meeting solution.

Based on the popular brix bench seating the brix-up combines an acoustic surround with a brix bench to create a beautifully detailed unit to suit a new way of working.

Brimming with character these slightly retro units provide a perfect workspace away from your workplace.

This traditionally-made seating range is a lesson in simplicity.

High quality craftsmanship and materials are combined to produce a contemporary design with deep cushioning, smooth sophisticated lines, and a range which offers the flexibility to create truly inspirational areas; defining spaces whether used in reception, breakout or meeting areas.

Available as an armchair, a two or a three seater sofa the understated elegance and style of Jensen are combined with a crisp aesthetic and a touch of retro to provide a range able to make a powerful architectural statement in any environment.

Jensen-up affords privacy in the modern business workplace, an oasis of calm in an otherwise active environment.

Based on the popular jensen soft seating sofa, jensen-up combines an acoustic surround with a single, two or three seater sofa to suit a new way of working.

With fine attention to detail, the acoustic, high-backed, jensen-up provides an ideal place for relaxing breaks, or casual and comfortable meetings, protected from the general hub-bub and distraction of background noise.

Simple yet flexible, fun and funky, angular yet soft, box-it makes it easy to brighten any space and can be re-configured continuously to meet the demands of the more informal meeting spaces.

One, two and three seat units, with black feet or optional castors, tables to suit temporary work spaces and meeting areas, plus NEW, more mobile, BOX 40 and Box 60 units have been designed to be able to be moved by an individual to create informal gatherings within a space, quickly and easily.

The option of a convenient but visually light tablet can turn that space into a learning, conference or study area, while the lower seating height Box 90 provides an opportunity to play with the different dimensions of the units and allows a lounge seating area.

vibe – plastic back

Vibe provides an ergonomically advanced, pleasingly refined seating collection. Offering the discerning client the specification, flexibility and comfort they deserve, but with a gentle environmental footprint and an elegant style.

Available with a full plastic back shell, fully upholstered or with a show wood outer back, Vibe can be tailored to suit most environments.

With a choice of two back heights and a generously proportioned seat with carefully tailored upholstery, Vibe is simple in form and light in design providing an elegant seating solution for the modern office.

Consideration has been given, at the design stage, to minimise the environmental impact of the chair. The upholstery can be removed and replaced, both to prolong the life and to reduce the environmental impact.

vibe task

The Vibe Task chair features the same ergonomically shaped back as the standard Vibe seating range. Available with two heights of back and a choice of adjustable height arms Vibe Task offers a robust, comfortable and competitively priced entry point into the Vibe chair collection.

By working closely with ergonomists, Verco have designed the Ergoform chair to control pelvic rotation. This automatically encourages the spine to adopt its natural 'S' shaped curvature, gently supporting the pelvic girdle and reducing the stress and strain on the lower back.

This combination of pelvic and spinal support generates a supremely comfortable chair, providing superior back support and the possibility of a reduction in the incidence of back pain.

All Ergoform operator chairs are certified to BS 5459: part 2: 2000: test level 'S'

A task chair family with a wonderful clarity of design and simplicity of line.

Clean lines and simple aesthetics mean that the Flow chair fits comfortably in most environments. Flow has a consistent design style; from the elegance of the new back frame to the specially designed and developed synchronised tilt mechanism, combining the back, armrest and seat in one continuous sweeping entity.

A breathable, elastic mesh provides superb support over a large contact area for long term user comfort, while the option of visitor chairs, conference chairs and two heights of task chairs mean that there is a chair to fit your own space and your own requirements.

Designed with simplicity in mind, max combines style with sophisticated engineering to provide the ultimate in operator seating.

A deluxe 'active' mesh back provides luxurious, yet responsive support, able to adapt to each user's back, offering high levels of seating comfort, while the back tension is controlled automatically to provide the correct tension for each and every user. Simple finger-tip adjustment ensures that the perfect posture can be achieved from the seated position.

A smooth, robust, synchronised seat and back movement, which encourages dynamic support, lies at the heart of this chair collection. Seat depth adjustment is standard on all chairs, while height adjustment arms complete this robust and versatile seating solution.

The ergonomically designed Profile back fits naturally into the curve of the spine while two heights of chair back ensure the versatility required.

Task chairs have the choice of two mechanisms and three base finishes, meaning that Profile is adaptable to any environment. A distinct waterfall front edge to the contoured, posture seat reduces the possibility of pressure under the thighs and a further optional seat depth adjustment ensures the ability to tailor the chair to fit each user for the ultimate in comfort.

The option of fixed or deluxe adjustable arms help combat the potentially painful problem of repetitive strain injury.

All Profile operator chairs are certified to BS 5459: part 2: 2000: test level 'S'

MT

The Cube occasional task chair range has been further enhanced by the addition of mesh-back chairs, available with or without arms and with either a black or a cream white frame.

These chairs feature a smooth and robust permanent contact back mechanism and provide an ideal companion for meeting, conference or occasional task workspaces.

emma - occasional task/meeting chair

The lines between the workplace and home are being blurred more and more, with many more people adopting a 'hybrid' style of work. However, working from home has never been easier or better than with the Emma chair to support and comfort you through the stresses and strains of the modern 'agile' work style.

Whether working at home or in the office, the Emma chair is able to sit harmoniously in any environment, providing an effortless sense of style with its seemingly simple design and clean lines.

Designed by Martin Ballendat

reddot

task seating

emma - occasional task/meeting chair

The emma chair includes a beautifully engineered, perforated plastic back with an integral armframe which is married to a posture seat pan with a flexible seat board, topped with CMHR foam and fabric of your choice.

The chair mechanism allows seat height adjustment, while the back frame has been designed to be flexible to allow the back to pivot in relation to the seat, providing the elegantly natural posture control expected from a Verco chair.

Emma's waterfall-edge seat design reduces any impact to the back of the knees. A contoured backrest fits naturally into your body's curves, and it flexes to follow your body's typical hip rotation, cradling the users back for increased lumbar support.

And of course, you can move freely and comfortably, with no adjustment required.

task seating

- Designed by Martin Ballendat
- Red Dot 2023 Design Award
- Slim, single-piece frame design
- Swivel-tilt seat mechanism
- 8-hour endurance seat cushion with tailored upholstery
- 'Sprung' seat board
- Shaped seat cushion with posture seat contour and waterfall front
- 'Built-in' lumbar support moulded plastic perforated back rest
- Twin-wheeled safety castors, colour coordinate with the frame and base
- Nine frame and base colour options:
  - Black, Light blue, Pink, Chalk white, Grey, Taupe, Yellow, Red, Dark blue
- 150Kg weight capacity warranty
- Verco 5 year warranty

Pop is a range of robust operator chairs with clean modern styling. The range includes a choice of medium or high backs, two arm types and three options of underseat mechanism.

Both backs feature a slim-line profile with a moulded plastic outer back, with their contoured shape and height adjustability they offer excellent support.

The synchronised mechanism, with its easy to use levers, provides excellent dynamic support, maintaining the users comfort throughout the day, while independent seat and back adjustment can be provided by the ISB mechanism and simple back rake angle adjustment mechanism provide a 'keen' entry price point to this versatile and popular seating collection.

The ergonomically shaped seat can be specified with an adjustable depth seat slide, providing increased comfort for different body shapes and applications.

please note: spider base available with synchronised mechanism only

Buzz offers a new concept in operator seating, combining aesthetics, ergonomics and sensitivity.

Underlined by its international style, its soft shapes and generous volumes, Buzz provides the requirements for all modern office environments. The large posture seat provides superior comfort, while the ergonomically profiled back provides the optimum support for continual use.

The range offers a choice of three mechanisms: synchronised, independent seat and back and back rake adjustment, each with finger-tip controls ensuring the chair is adjusted correctly for every user.

The Carlo task chair utilises modern materials to create a chair that is both practical and innovative. Utilising a stylish, robust yet flexible nylon back the Carlo chair manages to deliver superb comfort characteristics, with a modern aesthetic at a realistic price point.

Available with a generously upholstered posture seat with a pronounced waterfall front edge, together with a tension controlled tilt function, Carlo also offers a choice of armrests and is provided with our standard full five year guarantee.

A choice of backs are available in two stock colours; Black and White to suite into most colour schemes.

libra-flex\_'dynamic' seating stool

Designed for 'dynamic' sitting the **Libra Flex** stool interacts with the person sitting in it, and does that automatically, without the need to manually adjust a number of knobs and levers. The flexible 'arms' of the underseat carriage provide the movement, with control, while simple automatic operation, without complicated knobs and levers, results in **Libra Flex** always being ideally adjusted to each user at all times.

Workchair is a range of polyurethane technical seating, comprising of stools, chairs and draftsman's chairs.

All models are supplied with a black nylon base as standard. Polished aluminium base is available as an upgrade.

With the choice of back heights, footrings, seat types and anti-static castors, Workchair is the perfect solution for many commercial and industrial environments.

High and intermediate chairs are supplied on glides while low chairs are fitted with castors as standard.

All Workchairs are certified to BS 5459:1990, part 2: test level 'S'

Mix is a range of nesting visitor and conference armchairs with a modern feel and heightened comfort.

Chairs feature either a medium or full upholstered back, fixed at the armrest to achieve enhanced responsiveness.

An equally comfortable contoured seat allows the user to sit in comfort during longer periods.

A choice of silver or chrome cantilever frame also promotes micro-movements by the user, avoiding many of the problems associated with sitting still for a long time.

Upholstery is available in a huge range of quality fabrics, with the conference chairs featuring superior upholstery detailing.

A discreet buffer pad below the seat avoids marking of seat fabric when chairs are stacked.

everything and more.

A comprehensive , versatile range of elegant, sturdy yet comfortable visitor chairs. The collection offers a comprehensive family of seating for visitors, meetings, training sessions or conferences in both office and contract environments.

The ergonomic curve of the backrest is designed to fit the user's back snugly, for lasting comfort and its extremely strong, steel elliptical tube frame adds a touch of originality.

This fully stackable chair has been designed for intensive use in rows, in lecture theatres and conference rooms, whose needs in terms of layout and organisation change with each new event. Olivia can be easily handled and stored. Stacking guide glides allow the chairs to be quickly, simply and safely stacked without scratching the frames, or marking the upholstered seats, if specified.

Olivia - available with or without arm rests and four colours: graphite, white, brick or green

The multi-faceted chair is useful for various office environments.

Fly maximizes space efficiency by allowing both horizontal nesting with a flip-up seat pad and vertical stacking on a robust four legged chrome frame. Fly has a unique and light silhouette with either a plastic back or a simple 'active' mesh solution. With the option of armrests and writing tablets Fly represents the ultimate in a versatile and flexible, multi-purpose seating solution.

Colours

The elegantly fine solid wire chrome sled frame takes up little space, allowing light to travel freely, whilst being extremely strong and durable.

The comfortably moulded plastic seat and back are available in five colours – black, blue, grey, green and white.

The chairs stack together very closely, allowing large numbers to be stacked onto the special trolley and relocated or stored until your area becomes the next hive of activity.

Plastic feet protect floors and other chairs when stacked.

Sting has been tested and certified to;

Available in six colour finishes, the new thinner and lighter Stax 60 features an ample seat and back, a compact frame, the latest generation stacking and handling features. The iconic design is created from steel and the latest generation polyolefin resin, making it 100 percent recyclable.

### Exceptional materials

The most durable polyolefin resin ever in a chair. Precision-machined steel creates a light and compact and strong frame, providing great durability in any environment.

Colour makes a room friendly, inspiring or relaxing, so a choice of six colours for the body and frame ensure huge design scalability. So the beautiful new colour finishes help to fit in with your design aesthetic.

Of course all with a new level of stackability, seldom seen in this market.

The design of stacking chairs has moved forward with a seat and back made of high-performance, reinforced polyolefin resin.

The state-of-the-art seat shell takes Stax60 to a whole new level. More stackable than any other chair it sets new standards when it comes to lightweight and versatility. Able to be stacked up to 60 chairs high, Stax60 has a heavy duty trolley of it's own, tested to 400kgs, to provide this chair with even greater versatility.

A wide 3D ergonomically moulded seat and back make the chair very comfortable, while the 11mm solid rod frame ensure strength without compromise to design. 100% recyclable, state-of-the-art manufacturing methods and a two-component design add up to an attractive price and good value.

A choice of six colours for the body and frame ensure huge design scalability. Stax60 is the ideal choice for settings where style and practicality are equally important factors.

Stax60 carries a 10 year warranty and has been tested to the safety and stress tests:

**ANSI-BIFMA X5-1-2017**

**ANSI-BIFMA X5.1-1-2017/17**

Comfort

The ample seat and 3D back forms to the user's body encouraging correct sitting posture. Waterfall seat edge improves circulation to sit more healthy.

Iconic design re-defines functionality

Developing the shell and the frame together defines a whole new integration, making the boundary between the frame and the seat hard to discern.

Easy to stack for space saving with a special storage and transport trolley, meaning that up to x 60 chairs can be conveniently stacked low, and moved within the space quickly and easily.

100% recyclable

We use a special designed steel that's precisely machined to create a light, compact and incredibly durable frame. The chair seat and back are made with the latest generation polyolefin resin, making it 100 percent recyclable

- Spindle:**
- Powder coated steel barrel, providing swivel action
- Belle body:**
- Two part, moulded polypropylene body. Chalk white finish
- Seat:**
- Circular seat cushion. Combustion modified high resilient (CMHR). Tailored upholstery

belle\_mobile multi stool

Designed for 'dynamic' sitting, the **Belle** stool provides an agile, mobile seating solution for the ultimate in flexible seating. The soft curves of the Belle body provide the stability for peace of mind, while the five recessed twin-wheeled castors provide the movement, along with a smooth swivel upholstered, seat plate.

The open nature of the body allows personal items, bags or mobile devices to be kept safe and near to hand, in the body of the stool, even when mobile.

A fun and quirky solution for the modern office meeting place...

The Tapas concept has been developed specifically for café areas, restaurants and leisure settings. It represents the ideal marriage of design and versatility, adapting perfectly to any context. A line dedicated to both indoor and outdoor environments teamed with a range of outdoor specific seats developed to adapt perfectly to outdoor environments.

The new outdoor specific frames - 4 legs and stool - are made entirely of metal; a structure made form one single piece of material. The product lines are enhanced by the novel metal mesh-effect texture applied to the seat and backrest; a detail which adds prestige and distinction.

**High table:** the legs are finished in black, with black feet. The frame and practical footrest is also available in black. Suitable for both indoor and outdoor settings.

**Low table:** the legs are finished in black, with black feet. Suitable for both indoor and outdoor settings.

**Four-legged frame:** featuring a metal frame, developed for use outdoors. Available in pained black finish. The distinctive metal mesh-effect texture lends it great character. Available in standard and poseur heights.

**Stool:** the seat shell features a minimalist design available in black finish.

The quality of the working environment helps dictate the quality of the work that's done within it.

The aesthetic sense we're all born with gives beauty and elegance the power to inspire us to invent, create and achieve. And where ergonomics complement style, then you have an environment that plays a vital role in business performance.

This is the underlying conceptual approach that led us at Verco to ask renowned designers Roger Webb Associates to create our new dna office furniture system.

dna is based on a straightforward idea: that with a small number of component parts, you gain a straightforward solution to the demands of workstation design, providing a flexible, dynamic and innovative interpretation for the modern workspace.

An elegant leg frame supports a combination of worktop shapes and personal storage elements, affording clarity of thought and design in an otherwise complex environment. And when your needs change, it's easy to adapt to your changing circumstances.

It's tough and long lasting too, but when it does reach the end of its life, more than 97% of its materials can be recycled for an exceptional gentle environmental footprint

dna providing the building blocks for a healthier working life.

Design  
Guild Mark

"The Worshipful Company of Furniture Makers introduced the Design Guild Mark to reward the work of the finest furniture designers working in volume production in Britain. The Mark is awarded for excellence in design, use of materials, manufacture and function."

dna

**dna** furniture, designed in conjunction with Roger Webb Associates, is a new and visually exciting furniture concept, combining simple, clean and elegant design with the energy and flair required in modern office environments.

The understated design is continued in the first and second level storage options which integrate with the worktops and are used to define work territory, providing easy desk level storage and a privacy barrier.

Work surfaces feature radiused corners to soften the office environment and are available in veneer, laminate, MFC or glass.

TEN YEAR  
GUARANTEE

VERCO are so confident in the quality of our products that we offer a full 5 year guarantee on everything that we produce, however to reflect the superior strength of our furniture frames we offer a **10 year** guarantee on the framework of the DNA collection.

martin – collaborative furniture

With its clean lines and softer, friendly and less formal structure, martin offers an opportunity to bring a fresh new feel to the collaborative areas of your workspace.

The solid timber oak or walnut leg frames support a variety of veneered or laminate top shapes and sizes, with real attention to detail shown in the unique edge profile and in the conjunction of the materials employed; the texture and warmth of wood, with the precision and strength of steel and laminate.

Martin can transform your workspace with its striking and adaptive form that can speak to any environment.

## martin – collaborative furniture

The solid timber oak or walnut leg frames support a variety of veneered or laminate top shapes and sizes, with real attention to detail being shown in the unique edge profile and in the conjunction of the materials employed; the texture and warmth of wood, with the precision and strength of steel and laminate.

Martin can transform your workspace with its striking and adaptive form that can speak to any environment.

### leg frame option

standard laminate top finish

real wood veneer top finish

matt laminate top finish

### NEW matt laminate finish -

A brand new laminate material utilising nanotechnology to produce a super high quality, supermatt laminate surface, with anti-fingerprint technology and an antibacterial sealed ultra hard surface.

The nanotechnology also allows a thermal healing of scratches to the surface, while surface marks may be erased with the use of a simple sponge. The surface has a soft touch, is antistatic and easy to clean.

## rectangular desks

Martin rectangular desks provide a less formal and more friendly style of furniture for the modern office or executive space.

Frames are available in solid oak or walnut with tops available in real wood veneer to match, or in a combination of laminate with solid wood edge profiles.

This feature is also taken through to the modesty panel which also shows the same attention to detail and the solid wood edge profile.

## martin – rectangular worktable modules

Martin's clean and simple form brings an elegance and simple style to collaborative spaces. Featuring a reduced footprint depth of 1400mm, martin still provides ample workspace and is ideal for most spaces.

The use of intermediate legs allows the table to grow according to your needs, while still maintaining the informal and friendly feel of a collaborative work table.

The tables feature a central cable access channel, which may be customised by the use of different cable cover materials; laminate, fabric or wood veneer. The fabric option also brings the opportunity to introduce a 'splash' of colour to the workplace.

(please see page 212 for options)

under desk - wire management

under-desk cable tidy net

Under desk management is provided via optional metal cable trays, or by innovative hinged cable nets which secure cables within easy access, but out of sight and close to the desk underside when closed.

The standard cable spine provides vertical wire management, while the tops may be personalised by the use of our standard power modules, if required.

(please see page 399 for power modules)

martin – library table lights

Martin Library lighting can enhance any Martin table installation, providing a soft focus for users, in addition to a degree of visual separation where required.

The lights are designed to suite in with Martin, featuring a solid oak or walnut wood structure and featuring energy efficient LED lights. Each light is independently switched and is provided with it's own transformer and a 2m lead to a UK, 3 pin plug, to allow a simple 'plug and play' installation on site.

The temperature of the light is 'cool white' and the light level at the table top is 263 Lux.

top detail

A choice of eleven finishes: Oak, Beech, Maple, Natural Walnut, Natural Cherry, Forest Oak, Dove grey, Lead, Graphite, Black and Ice white are complimented by the silver, black or gloss white legs and detailing throughout the range.

**TEN YEAR  
GUARANTEE**

VERCO are so confident in the quality of our products that we offer a full 5 year guarantee on everything that we produce, however to reflect the superior strength of our furniture frames we offer a **10 year** guarantee on the framework of the oblique furniture collection.

oblique visual – 120° ergonomic desk pods

Oblique Visual furniture collection offers the ergonomic advantages of the 120° desk and two and three person pods. This particular shape has been found to provide the maximum useable workspace with the minimum of floor space and can be linked to provide organic layouts within the workspace. The use of additional bench extension units can further break-up an otherwise regimented layout.

description					dimensions		code		price

## jack – rectangular bench

Personal workspaces should be designed to support both collaboration and focussed work. The new model and balance in contemporary design provides the ideal partner for meeting the ever changing needs of the multi-functional workspace.

Benches are created by connecting extension units to a starter unit. You can link as many extension units as required to complete your chosen configuration.

Please see page 322 for full details of our screen collection.

**Please note:** Extension units may only be added to 4 and 6 person bench units.

oblique adapt – height adjustable furniture

It has been shown that working standing up for part of the day has a positive effect on our health and improves our capacity for concentration, productivity and well-being.

The electrical adjustable height system provides a smooth, robust and realistically priced height adjustable sit-stand solution for the ultimate flexible workspace. Verco offer this option on our oblique adapt single desks and back to back bench system.

**NB** each back to back bench is provided with 2 x spacer brackets which should be fitted between adjoining oblique adapt back to back benches to ensure a gap between the height adjustable tops, for safety purposes.

**This 25mm gap will effectively extend the overall length of each multiple back to back bench unit.**

The quality of the working environment helps dictate the quality of the work that's done within it.

The aesthetic sense we're all born with gives beauty and elegance to inspire us to invent, create and achieve. And where ergonomics complement style, then you have an environment that plays a vital role in business performance.

Height settable desking

The height of each DNA desk can be made height settable by the addition of 40mm spacers between the bottom and the foot of each individual leg. It is possible to 'stack' up to three of these spacers together to provide desk height adjustment between 730 – 890mm

height settable rectangular desks

## oblique – height adjustable furniture

The popular Visual Oblique furniture collection can offer height adjustability through two systems of height settable adjustment

The simplest system provides an affordable system by providing standard frames from the Oblique desk range which have been adapted to include a height settable insert, providing the means to create height settable desk top heights of between 720 – 860mm in 20mm increments

### height settable rectangular desks

description		dimensions	code	price
	height settable rectangular desk 800mm	2400 x 800 x 720-860mm	<b>OVRD 2408 HA</b>	939
		2000 x 800 x 720-860mm	<b>OVRD 2008 HA</b>	904

		1600 x 800 x 720-860mm	<b>OVRD 1608 HA</b>	814
		1400 x 800 x 720-860mm	<b>OVRD 1408 HA</b>	803
		1200 x 800 x 720-860mm	<b>OVRD 1208 HA</b>	776

### frame inserts

description		code	silver / white finish
	a pair of height settable leg frame inserts, (supplied fitted to a leg of your choice) which may be adjusted in 20mm increments between 720 – 860mm black, silver or white finish	add suffix of <b>HA</b> to the leg frame code e.g. OLF 08 HA	+ 65 in addition to the price of a standard fame

### oblique desk top height spacers

The tops of Oblique furniture can also be spaced away from the frame using a special top height spacer kit. Each kit provides 25mm of increased height from the standard 720mm and may also be stacked to provide up to 100mm of additional height.

### desk top height spacers

description		code	silver / white finish

aston – executive furniture

Please specify: 1) carcass finish  
2) edge profile finish  
3) drawer front finish

Pedestal and storage units may be specified with a single wood veneer finish to the carcass, either oak or natural walnut and including a solid wood edge profile of the same finish, or in bright white or black through-colour laminate with a solid wood edge profile.

The drawer and door fronts may be specified separately in a choice of either oak or natural walnut, bright white or black laminate finish.

Every product has a unique personality...

top finish

standard laminate top finish

real wood veneer top finish

matt laminate top finish

With its clean lines and softer, friendly and less formal structure, martin offers an opportunity to bring a fresh new feel to the collaborative areas of your workspace.

The solid timber oak or walnut leg frames support a variety of veneered or laminate top shapes and sizes, with real attention to detail shown in the unique edge profile and in the conjunction of the materials employed; the texture and warmth of wood, with the precision and strength of steel and laminate.

Martin can transform your workspace with its striking and adaptive form that can speak to any environment.

edge profile

**NB** please note the edge profile finish will always match your choice of leg frame finish

# oblique visual – desking

The Oblique Visual desking range maintains the traditional attention to quality and detail for which VERO has established a reputation.

Table tops are 25mm thick MFC with 2mm edging for durability.

Silver, black or white metal leg frames include height levellers as standard, and can be shared between desks, end to end and back to back, keeping components to a minimum whilst improving the structural integrity.

A choice of ten finishes: Oak, Beech, Maple, Natural Walnut, Natural, Cherry, Forest Oak, Lead, Graphite, Dove Grey or Ice white, are complimented by the silver, white or black legs and detailing throughout the range.

Flexible enough to meet your every requirement, yet simple enough to change according to the needs of today's fast moving office environments.

...simple and flexible

oblique visual – 120° ergonomic desk pods

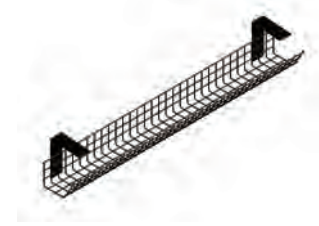

Oblique Visual furniture collection offers the ergonomic advantages of the 120° desk and two and three person pods. This particular shape has been found to provide the maximum useable workspace with the minimum of floor space and can be linked to provide organic layouts within the workspace. The use of additional bench extension units can further break-up an otherwise regimented layout.

open – reception units

Open reception allows base and top modules to be joined simply and easily with the use of an infill panel between modules. This panel is supplied in a brushed steel finish as standard, to match the plinth.

The desk leg infill panel is supplied with two cut back legs to permit freedom of movement between the two desks.

visual – ‘Prestige’ divider units,

With flush-fitting, inset doors and touch-latch door closures these divider units are sleek in style and modern in character. All units feature a single adjustable shelf in the storage cupboard, with the possibility of open shelving above the closed door storage unit.

The shelf units are internal height and width of 340 x 461mm, each with an off-set, fixed rail to prevent A4 folders from being pushed through the units. All horizontal shelves are Graphite MFC finish. The central vertical dividing panel will match the carcass finish.

Two-tone finishes can be specified for the doors, as an optional extra using different MFC, laminate or linoleum finishes. (see below).

martin credenza units

The credenza is available with oak or natural walnut veneer carcass, with either a veneered top surface or laminated top surface, with a single adjustable shelf. Each unit is supplied with recessed finger-pull detail, height levelling feet on solid timber legs.

Each unit is supplied with a coloured highlight shadow gap, black, white or camira sonus fabric.

\* The 900mm high units may be fitted with an optional fridge unit + £995 RRP

martin credenza units

Martin credenza units are now available with drawer sets, as an option. Each set of drawers may only be specified on the right hand end of the units, (except the 2000mm length unit where they are on both hands).

All drawers feature gentle 'soft close' runners as standard.

The doors and drawers are also available with a standard laminate finish option, at no cost, or a 'special, engraved laminate finish in one of three standard designs.

This may be enhanced still further by using a 'special' laminate from the Formica fundamentals range, (excluding metallics and gloss finishes), or with nano laminate at an extra cost of 5%.

special laminate finish doors, or drawers with engraving - **extra £125 per door/drawer set.**

locker caddies

Slotting neatly into lockers, these caddies are engineered to completely de-stress workspace set-ups no matter how much stuff you have. With a laptop/tablet compartment, a handy divider, pen pots and your choice of interchangeable fabric covers it will organise anything and look good while it does it.

These are made from polypropylene, which is fully recyclable at the end of use and has a range of different fabric covers available to complement the caddy. The grey eco-friendly caddy is made from recycled polypropylene.

planters\_

planters\_

Planters make life greener.

The COVID-19 pandemic has caused many businesses to reassess their workplaces, to create working environments that are both reassuringly safe and welcoming, to support employees returning after many months of working from home.

Biophilia is a simple concept: it defines our innate desire to stay connected to nature. Research has suggested that simply spending time closer to nature can be beneficial to human health. Plants, especially real plants are great for our mental wellbeing, thanks to the biophilic benefits we get from being close to nature.

Each planter is supplied complete with a number of deep plant trays, depending on the width of the planter, ready to accept potted plants.

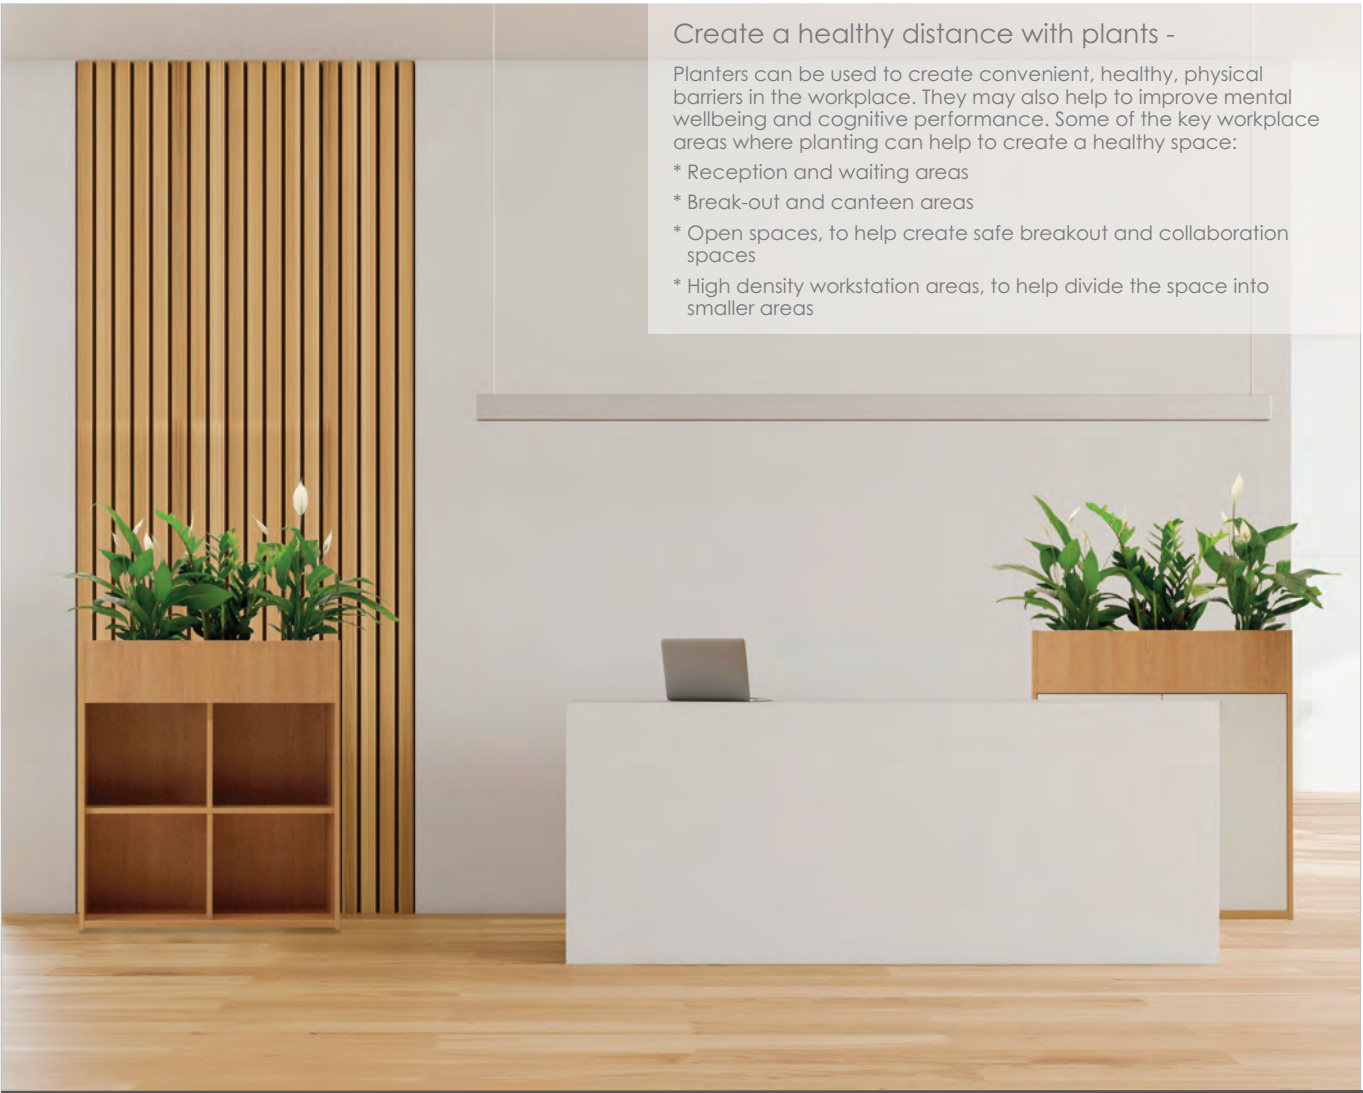

Each planter is supplied complete with a number of deep plant trays, depending on the width of the planter, ready to accept potted plants.

**N.B.** All plants need some natural sunlight to survive, so check how much your office gets. If it has bright, indirect light, most plants will live happily in the space.

Create a healthy distance with plants -

Planters can be used to create convenient, healthy, physical barriers in the workplace. They may also help to improve mental wellbeing and cognitive performance. Some of the key workplace areas where planting can help to create a healthy space:

- \* Reception and waiting areas
- \* Break-out and canteen areas
- \* Open spaces, to help create safe breakout and collaboration spaces
- \* High density workstation areas, to help divide the space into smaller areas

Please specify MFC finish required. Two-tone finishes available at no charge. Handle finishes: polished aluminium (PO), black (BL), or white (W)

dna – formed felt screens

DNA screens are now available in the new 'formed felt' material.

This material is manufactured from compressed fabric fibres, specially bonded with a resin to produce a stiff fabric board. The 3D nature of these screens brings a robustness to the screens as well as an interesting aesthetic. **'Formed felt' screens are available from stock in charcoal finish only.**

Each screen comes without screen brackets, please see below for the correct bracket for either single desks or bench desk arrangements.

'formed felt' – 3D division screens

## martin – 3D formed felt division screens

Manufactured from polyester fibre-fleece mats to create a dimensionally stable fibreboard, able to accept and retain the complex 3D texture and shape of the Martin formed felt screens.

The formed felt material has both sound-reducing and sound absorbing properties and has been tested to EN 1021 Part 1 and 2 in terms of fire safety and can be fully recycled at the end of life.

## oblique – desk mounted upholstered system screens

**Please note:** Oblique screens are designed to provide robust and versatile workstation division for use with all Oblique single desks and Oblique benches. They are supplied with **square** aluminium posts. They are **not** suitable for use with any other range of furniture.

Oblique screens are supplied **without** screen brackets, which must be specified separately (see below).

– For single desk situations the OSJB brackets must be used.

**Please see examples below for guidance on the correct specification for these screen brackets.**

## oblique – desk mounted screen brackets

	description	code	price
	a pair of oblique screen support end brackets, for use on bench <b>end</b> frames (on back to back bench desks only)	<b>OSEB</b>	95
	a pair of oblique screen support spigots for use with <b>intermediate</b> leg frames (on back to back bench desks)	<b>OSIB</b>	42
	oblique single desk screen brackets (for use on single oblique desks only)  (only silver and white finish)	<b>OSJB</b>	74

### examples

Single desk - single screen

2 x back to back bench desks - single screen

4 x back to back bench desks - 2 x screens

**please note** oblique screen brackets are available in silver (**S**), black (**BL**) or white (**W**)

oblique – desk mounted screens for **standard** desk tops

The standard screen features a gap between the bottom of the upholstered panel and dest top for improved access to the central cable trays. If this gap is not required, please specify 'scalloped' screens which have no gap and the upholstered panel continues below the desk top surface.

**Please note:** brackets must be specified separately.

- Edge trim finish:
- Black or white finish only

A perimeter to define space.

Enclave screens are sculptural in form and architectural in execution, both articulating and creating space. Enclave creates intimacy in open areas with sound absorbing panels to support focus, concentration and collaboration. Available in a choice of three heights of screen, with increasing sound absorption and reflection performance, enclave is able to achieve your desired level of privacy, simply, quickly and efficiently.

Creation of different neighbourhoods within the office community.

Enclave enables a balance to be struck in shared spaces within the communal office. Creating a vibrant 'village' of different, interesting and thoughtful spaces for different work scenarios.

Designed by Studio Verco.

turbine – vertical screens

Turbine - vertical screens

Turbine screens allow a variety of visibility and sound absorbing levels, simply by rotating the angle of the screen vanes. Available in a choice of five screen heights and with the option of four base configurations, turbine screens are ideally suited to open plan workspaces, receptions or wherever acoustics, style and innovation play a key role.

**N.B.** The upholstered versions are available in a choice of two fabric grades.

mobile high screens

The introduction of high, mobile, upholstered screens can offer greater protection and privacy, where required and can be re-positioned quickly and simply.

The large, lockable castors make moving these screens a simple task. They can be easily introduced to existing furniture layouts with no reconfiguration of the existing furniture and are particularly useful when workstations are next to busy walkways, or providing simple, quick and easy separation in increasingly busy workspaces.

Available in an ideal height of 1500mm and in three widths, these screens are also available in MFC, a laminate whiteboard finish or upholstered in Camira Blazer Life fabric, with black or white legs.

## monitor arms

We are pleased to offer a selection of sophisticated and ergonomically sound monitor arms, from a simple single arm with manual height adjustment, through to spring and gas assisted options for heavier monitors and arms suitable for use with two monitors.

description		code	price
	2 beam, post mounted monitor arm with manual height adjustment and clamp fixing. Suitable up to 15kgs max. Max height adjustment 430mm from desk top. Max forward extension – 460mm. 75mm and 100mm VESA compliant, with full cable management. White / Silver / Black finishes.	VM 210	190
	Spring assisted monitor arm, quick to assemble and easy to use, facilitating single monitors. Max arm reach - 545mm. Height to VESA centre - 170 - 450mm. Max weight - 8kg per arm. White / Black finishes.	SSA 1	226
	Easy to install and adjust entry-level monitor arm that can evolve with your workstation. The <b>LMA</b> monitor arm comes as a clamp, post and arm that requires minimal tools to attach to your desk. With the press of a button, you can move your screen up or down to the ideal height for you. It can also be tilted up to 80° back, or 10° forwards. Max height adjustment 240-450mm. Max weight 6.5kg. White / Grey / Black finishes.	LMA 1	247
	Innovative ratchet tilt adjustment with safety clutch mechanism using easy-to-access lever. Smooth gas lift for easy height adjustment. One-touch easy position adjustment is ideal for hotdesk workspaces. Clamp is tightened from above desk for easy installation. Max arm reach - 405mm, Max weight - 2-10kg per arm. White / Silver / Black finishes.	LSA 1	253
	The MLS single slimline gas lift monitor arm has been certified to the ergonomic standard BS EN ISO 9241 Workplace ergonomics and provides a superb gas assisted finger-tip adjustment, with elegance and strength. Suitable for screens 2-10kg, the arm features a desk clamp, which is installed from above the desk, making installation very quick and also includes complete cable management. An easy use, fully flexible and aesthetically pleasing monitor arm. White / Silver / Black finishes.	MLS S	267
	Fluid, dynamic movement for adjusting the position of the monitor screen. This monitor arm allows smooth, intuitive adjustments of the monitor. Max weight 3-9kg per arm. White / Silver / Black finishes.	DYN 1	324

## monitor arms

Use to replace the standard base supplied with monitors, the purpose of a monitor arm is to provide considerably more adjustment to the height, angle, positioning etc. of the monitor, in order to suit the individual using it. Monitor arms help to create a more ergonomic workstation and can help to reduce symptoms such as back and neck ache and eye strain.

cpu holders

These CPU holders are suitable for most desktop / workstation computers. Simple to mount to the underneath of the desk top, the CPU is less prone to damage and is easier to access. The VCPU 1 has a swivel and slide function for even easier access while the VCPU 2 also has a swivel function to aid access.

dna – tables

designed in association with Roger Webb associates

The aesthetic sense we're all born with gives beauty and elegance the power to inspire us to invent, create and achieve. And where ergonomics complement style then you have an environment that plays a vital role in business performance. We believe that style, elegance are equally important at every level within an organisation. So as with all products in the DNA range, the choice of materials , finish and configuration means there is an appropriate table for every use and every department, from Boardroom to post room.

martin – table collection

Martin tables are available with either veneer tops with a solid wood edge profile or with laminate tops with a solid wood edge profile. Each top has a curved chamfer on each long edge, providing a unique aesthetic to each and every martin table.

The leg frames are available in either solid oak, or in solid natural walnut timber. Each leg frame comes complete with height levellers and forms the structural frame for the table, along with the steel support rails in either gloss black or gloss white.

Martin tables can be specified with a range of power modules and under table cable management. (please refer to pages 363 for more details).

martin – library table lights

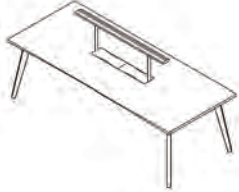

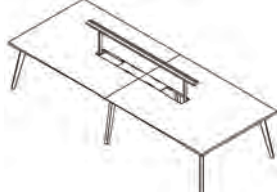

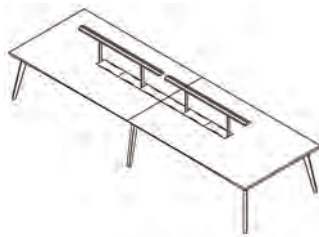

Martin Library lighting can enhance any Martin table installation, providing a soft focus for users, in addition to a degree of visual separation where required.

The lights are designed to suite in with Martin, featuring a solid oak or walnut wood structure and featuring energy efficient LED lights. Each light is independently switched and is provided with it's own transformer and a 2m lead to a UK, 3 pin plug, to allow a simple 'plug and play' installation on site.

The temperature of the light is 'cool white' and the light level at the table top is 263 Lux.

**N.B.** Library lighting is designed to be fitted via MAP panels, (which must be specified separately), or via martin cable ports, (see below)  
**MCP** - £265/pair

martin high table collection

Martin high tables, at the height of 1,050mm, offer a fantastic opportunity to work and collaborate in a different way. Tables are available with a choice of laminate, or veneer finish tops, all with solid wood lipping which features the characteristic 'camber chamfer' along the long edges.

The leg frames are solid timber, either oak or walnut and come complete with a powder-coated steel footrail in either black or white finish.

The high tables are particularly suited to standing meetings or alternatively sitting on high stools, selected from our seating collection.

partner tables

Partner meeting tables are another development from our large portfolio of meeting and conference tables.

They are available both with solid wooden legs, (Martin) and with robust tubular steel legs (Campus). All tables feature a circular high table with a diameter equal to the depth of the oval table to which it is joined.

Partner tables provide an interesting and useful variety of meeting solutions in a single piece of furniture.

Martin features solid wood lipping on both tables, with a square edge profile and is available in laminate top Nano laminate or veneer finish only. While all standard MFC finishes are available, with a square edge profile on the Campus range with the option of robust laminated tops or veneered tops are available with a reverse chamfered and polished edge profile.

All tables feature height levellers and can be fitted with power modules in either the high or standard height table and with wire management, as required. (See page 399).

The circular high table is 1050mm height while the lower oval table is a standard 740mm height.

box-it meeting tables

Box-it meeting tables are a development of the popular box-it collection. Available in bright white laminate finish on a solid ply core the table has a distinctive, crisp mitred corner joint and a polished edge profile. The tables are available at a height of 740mm and 1050mm and provide an alternative break-out/meeting space to standard meeting tables.

visual max tilt-top tables

Providing a larger meeting table dimension, the new Visual Max tilt-top tables are another development from our large portfolio of meeting and conference table collection.

Available at a height of 740mm and with top finishes of both MFC and laminate, with a square edge profile, these tables are large enough to provide great conference table options as well as being incredibly agile, allowing quick and simple reconfiguration whenever required.

**4 legged high stool:** Steel frame with a black plastic seat and low back  
**Low table:** Steel frame painted black with gloss black feet. Top 10mm thick black core laminate  
**High table:** Steel frame painted black with gloss black feet. Top 10mm thick black core laminate

The Tapas concept has been developed specifically for café areas, restaurants and leisure settings. It represents the ideal marriage of design and versatility, adapting perfectly to any context. A line dedicated to both indoor and outdoor environments teamed with a range of outdoor specific seats developed to adapt perfectly to outdoor environments.

The new outdoor specific frames - 4 legs and stool - are made entirely of metal; a structure made from one single piece of material. The product lines are enhanced by the novel metal mesh-effect texture applied to the seat and backrest; a detail which adds prestige and distinction.

**High table:** the legs are finished in black, with black feet. The frame and practical footrest is also available in black. Suitable for both indoor and outdoor settings.

**Low table:** the legs are finished in black, with black feet. Suitable for both indoor and outdoor settings.

**Four-legged frame:** featuring a metal frame, developed for use outdoors. Available in painted black finish. The distinctive metal mesh-effect texture lends it great character. Available in standard and poseur heights.

**Stool:** the seat shell features a minimalist design available in black finish.

box - it coffee tables

Box-it coffee tables are an inventive and playful addition to the simple but versatile box-it seating range. They allow for flexible and fun configurations, whilst providing a neat and space saving solution in public areas, where space is at a premium.

Featuring either a polished plywood edge, with high density 'through-colour' bright white laminate to the surface, or a simple MFC top, with both tops being supported by a cruciform white MFC base, the clean and sharp detailing of the tables compliment the seating range perfectly, as well as most interiors and environments.

Make it happen...

never stop, except for tea,  
then stop for a bit.

Sockets installed in office furniture are intended to supply office equipment with a rating not exceeding 5 Amp.

Relevant British Standards may be used as a means of demonstrating safety and in the case of electrical systems within office furniture the relevant standard for systems connected to the mains supply by means of a 13 Amp plug is BS 6396:2008 + A1:2015. The maximum number of socket outlets that may be connected from a single supply cable fed from a 13 Amp BS 1363 plug is six, when each socket is fused to 3.15 Amp.

general information,  
fabric and finishes

furniture finishes

standard – veneer finishes

standard – laminate finishes

Plus all mfc  
finishes below

N.B. All coloured and wood grain laminates are only available for one piece top tables with a maximum depth of 1200mm, as standard. Larger tables can be manufactured by using the laminate in a 'cross-grain' direction and on multiple table pieces.

ultra-matt – laminate finishes

**ultra-matt, nanotech laminate**

The external surface of Verco's matt laminate involves the use of nanotechnology and it is characterised by next generation acrylic resins, hardened and fixed with Electron Beam Curing process. With low light reflectivity, its surface is extremely opaque, anti-fingerprint and features a very pleasant soft touch. Besides the main features, such as thermal healing of micro-scratches, this innovative material stands out for specific properties, which facilitate normal cleaning and do not require particular maintenance. In fact, it is extremely easy to clean and is resistant to mould, it has enhanced anti-bacterial properties, it is resistant to rub, scratches and abrasion, as well as to acid solvents and household reagents.

standard upholstery fabrics\_by band

Textiles can bring colour, warmth and design to commercial spaces, in addition to beneficial acoustic properties.

We are pleased to offer a choice of fabrics for a wide range of commercial interiors; offices, schools, universities, bistro areas, restaurants and healthcare. Some fabrics feature man-made materials and are ideal for heavier use within open-plan offices, call centres, conference areas, while other fabrics feature a higher wool content, providing a beautifully relaxed drape and sublime handle which is ideally suited to the many soft seating ranges offered within our portfolio.

These fabrics cover applications for seating in a vast array of compositions, colourways and price points. They include a wide choice of environmental fabrics, made from recycled raw materials, or rapidly renewable sources such as wool and innovative bast fabrics from nettles and hemp. All fabrics meet international technical standards and come with a minimum 5 year guarantee of wearability.

**Please note:** two tone upholstery will be charged at the higher priced fabric band possibly + % per unit

**Please note:** all deliveries are to **ground floor only** and within normal delivery routes. The driver making the delivery will be unaccompanied and the purchaser is required to provide free assistance in unloading the delivery.

general information – seating

Verco seating has been designed and manufactured to conform to the following standards:

<b>BS 4875</b>	strength and stability
<b>BS 5459 - part 2</b>	strength and stability
<b>BS EN ISO 1335 – 1</b>	dimensions
<b>BS EN 15373</b>	strength and stability
<b>BS EN ISO 9241 – 5</b>	ergonomic requirements

Non-standard wood finishes

Wood products are finished in one of the six available options of: cherry, oak, rosewood, beech, walnut and maple. Other finishes and agreed samples can be used at an additional cost of 10% of the order value. Please note that while every effort is made to match to agreed samples supplied, as the base material is a natural product, Verco cannot guarantee an exact colour, grain or texture match and some variation must be expected.

Care of wood finishes

The lacquer applied during finishing of the products creates a hard protective surface finish and is resistant to moderate heat and abrasion. All spillages should be wiped off immediately with a damp cloth. The only cleaning necessary is to wipe with a damp cloth and polish with a soft duster.

Care of upholstery

In order to maintain the fabric over the five year guarantee period, upholstery must be cleaned and hoovered on a regular basis. For further information, please contact your nearest stockist. Please note that as leather is a natural product, each hide is unique and surface, growth and bruise marks distinguish it from plastic. These marks are features of leather, not faults. For regular cleaning of leather upholstery simply hoover then take a soft cloth and wring it out in warm soap solution - mild soap, never detergent. Wipe the leather using a light circular motion, taking care not to soak the leather. Repeat using clean water.

Gas action weight limitations

All gas assisted seat height mechanisms used on verco seating products are independently tested and approved up to and including a maximum weight limitation of 150Kgs (or approximately 22 stone) in normal office use.

Castor types

The specification of special castors may be required for special floor surfaces and/or usage. Generally soft-wheeled castors are recommended for smooth floor surfaces, e.g. wooden or laminate floors. Brake unloaded castors may be specified to prevent the chair from moving when not in use and brake loaded castors will ensure the chair is stationary when in use.

# general information – furniture

All furniture has been designed to conform to the strength and stability requirements of British and European performance standards.

<b>BS EN 527 – 1: 2011</b>	dimensions
<b>BS EN 527 – 2: 2016+A1:2019</b>	safety, strength and durability requirements
<b>BS EN 527 – 3 : 2003</b>	strength and stability
<b>BS 4875</b>	strength and stability
<b>BS 5459 – 2 : 2000</b>	strength and stability
<b>BS EN ISO 9241 – 5 : 1999</b>	ergonomic requirements
<b>BS 6396: 2008 + A1: 2015</b>	electrical systems in office furniture

### Veneer shade / grain variation

Please note that when furniture is specified with real wood veneer, which is a natural product, furniture is batch manufactured and finished with a clear lacquer finish. All veneers are selected to be within a shade and grain tolerance, however variations in both shade and grain are inevitable and should be viewed as features of this natural material, not faults.

If product is required to be 'suited', please add 20% to the price of each item.

### Care of real wood finishes

The lacquer applied during finishing of the products creates a hard protective surface finish and is resistant to moderate heat and abrasion. All spillages should be wiped off immediately with a damp cloth. The only cleaning necessary is to wipe with a damp cloth and polish with a soft duster.

### MFC – Multi-sectioned tables

Please note that when multi-sectioned tables are specified with woodgrain MFC top finishes, we cannot guarantee an exact grain match across the sections.

# general information

### Quality & Environmental

Verco Office Furniture Limited manufacture all products under the stringent **BS EN ISO 9001: 2015** quality assurance standard. Products are continually assessed to ensure they conform to the strength and stability requirements of British and European performance standards. Full details on request

Verco Office Furniture Limited is committed to continually improving the environmental impact of our activities, products, and services and to continually improving our environmental performance. **BS EN 14001: 2015** specifies the requirements for an environmental management system (**ems**), which provides the framework for Verco to control any impact.

Time taken at the design stage of any new product can have an immediate and fundamental effect on that product's environmental impact. From the careful selection of materials to maximise the recycled content and to minimise both the energy and CO2 footprints, to the 'end of life' recyclability of the component parts, particular consideration has been given to the environmental impact at every stage, from the design concept through to final production.

### FSC

VERCO Office Furniture Limited is accredited to the Forrest Stewardship Council ® (**FSC®**) and to the Furniture Sustainability Programme (**FISP**) and are committed to:

- Complying with all relevant legislation and regulations that affect our activities.
- Continually improving the environmental impact of our activities, products, and services and to continually improving our environmental performance. BS EN 14001: 2015 specifies the requirements for an environmental management system (ems), which provides the framework for Verco to control any impact.
- Reducing the Company's use of energy and other resources, by increasing efficiency and by reducing all forms of waste, air, and water pollution from its site.
- Conducting environmental audits at regular intervals according to their associated risk.
- Providing training and information to all our employees to ensure they fully integrate this policy into their responsibilities at work.
- Making this policy available on request

### Modern Slavery & Human Trafficking

Verco is committed to preventing acts of modern slavery and human trafficking from occurring within its business. We always work to the highest professional standards and comply with the Modern Slavery Act 2015 (and 2018 Reviews) plus all laws, regulations, and rules relevant to our business. We expect high standards from those we work with and are committed to ensuring there is no modern slavery or human trafficking in our supply chains.

Slavery, child labour and human trafficking are serious crimes and a violation of fundamental human rights. There are various forms of this 'Modern Slavery', which deprives victims of their liberty and usually involves financial exploitation. We conduct our business fairly, ethically and with respect to fundamental human rights. We are fully committed to the prevention of all forms of slavery, forced labour or servitude, child labour and human-trafficking, both in our business and in our supply chains.

# general information

## Guarantee

All products are inspected before despatch. Verco Office Furniture Limited undertake to repair or replace any structural part which proves to be faulty, when used under normal office conditions, provided it is returned to our works, carriage paid, within five years of manufacture.

VERCO are so confident in the quality of the materials and workmanship within our products that we offer a full 5-year guarantee on everything that we produce. In addition, to reflect the superior strength of our furniture frames we offer a 10-year guarantee on the framework of the: DNA, Oblique, and Visual Beam furniture collections.

## Development and construction

In order to maintain continuous development, the right is reserved to revise, without notice, material, price, and construction details of any item of furniture model as these become desirable.

## Order Cancellation

Orders may be cancelled or altered only with the written consent of the company. Goods made to special order cannot be cancelled. Verco reserves the right to claim all loss and expenses which may be incurred as a result of cancellation. A handling charge of 25% of the net invoice value, or £200 whichever is the higher, is made on any goods cancelled or returned with the prior consent of the company.

## Carriage Charges

All orders are delivered FOC to the Dealer's address, (or usual Installation Company address).

All orders delivered directly to third party addresses within mainland UK, on the specific instructions of our customers will be subject to a direct delivery charge. This charge is dependent on the value of the order, the location of the delivery and the site being accessible for HGVs, and within normal routes and times.

## Direct Deliveries to site by Verco:

All orders with a net value of less than £5,000:	<b>£150 net.</b>
All orders with a net value between £5,000 and £10,000:	<b>£200 net.</b>
All orders with a net value of over £10,000:	<b>FOC</b>
All Direct Deliveries required on a <b>specific date and time</b>	<b>P.O.A.</b>

**Please note:** all deliveries are to **ground floor only** and within normal delivery routes. The driver making the delivery will be unaccompanied and the purchaser is required to provide free assistance in unloading the delivery.

## Prices:

All prices are exclusive of VAT, which is charged at the appropriate rate.

This price list cancels all previous price lists.

E. & O.E.
